

Weekly Progress Report

Name: Shrutika Bhimashankar Patane

Domain: Python Intern

Date of submission: 08/03/2026

Week Ending: 01

I. Overview:

This week, the primary focus was on understanding the USC_TIA system and contributing to Python-based development activities. Efforts were also directed toward improving programming skills through learning resources and applying these concepts to project tasks.

Additionally, work was carried out on developing a simple **Python Quiz Game application**, which helped strengthen understanding of file handling, loops, and conditional statements.

II. Achievements:

1. USC_TIA Familiarization

- Explored USC_TIA documentation to understand its architecture and core functionalities.
- Studied the workflow and basic features of the platform.
- Successfully executed basic tasks within the USC_TIA environment, demonstrating initial familiarity with the system.

2. Python Project Contributions:

Name of the Project: Quiz Game

- Contributed to the development of a Python-based quiz application.
- Implemented functionality to read questions from a text file and display them to the user.
- Developed logic for collecting user answers and validating them.
- Assisted in designing a scoring system to calculate user performance.

3. Learning Python:

- Improved understanding of Python programming fundamentals.
 - Gained practical knowledge of concepts such as:
 - File Handling
 - Loops (while loop)
 - Conditional Statements (if-else)
 - Applied Python programming skills to solve practical problems within the project context.
-

III. Challenges:

1. USC_TIA Integration

- Faced challenges while understanding the integration of USC_TIA with certain tools and components.
- Some configuration issues arose during initial setup.

Approach to Solution:

Reviewed documentation and attempted troubleshooting steps to resolve configuration issues.

2. Python Project Complexity

- Experienced difficulty in understanding certain parts of the Python program logic, particularly file reading and indexing of question data.
- Required additional practice to structure the program correctly.

Approach To Solution:

Reviewed learning materials, practiced coding examples, and consulted mentors to clarify doubts.

IV. Learning Resources:

1. USC_TIA Documentation

- Referred to official USC_TIA documentation for understanding system functionality.
- Watched online tutorials and webinars to gain deeper insights into the system.

2. Python Learning Resources

- Studied Python programming through online tutorials and documentation.
 - Practiced coding exercises related to file handling and loops.
 - Participated in coding practice activities to improve problem-solving skills.
-

V. Next Week's Goals:

1. USC_TIA Enhancement

- Resolve remaining integration issues related to USC_TIA components.
- Explore advanced features and functionalities of the system.

2. Python Project Development

- Continue development of the Quiz Game application.
 - Add new features such as score percentage calculation and improved input validation.
-

VI. Additional Comments:

This week provided valuable exposure to both system-level understanding and programming practice. The experience helped in improving technical knowledge, debugging skills, and overall confidence in Python programming. Continued learning and collaboration with team members will further contribute to the successful completion of project tasks.
