

Weekly Progress Report

Name: Shrutika Bhimashankar Patane

Domain: Python Intern

Date of submission: 18/03/2026

Week Ending: 02

I. Overview

During Week 2, the focus shifted from basic understanding to practical implementation and enhancement of the Python Quiz Game project. Efforts were made to improve the functionality of the application, enhance user interaction, and strengthen integration knowledge of the USC_TIA system. Additional emphasis was placed on applying Python concepts to solve real-world problems and improving code quality.

II. Achievements

1. USC_TIA Progress

- Gained deeper understanding of USC_TIA features and workflow.
- Successfully worked on resolving initial integration issues.
- Performed intermediate-level operations within the USC_TIA environment.

2. Python Project Development

Name of the Project: Quiz Game

- Enhanced the quiz application by improving code structure and readability.
- Implemented score percentage calculation.
- Added input validation to handle invalid user inputs.
- Improved file handling logic for better performance and reliability.
- Tested the application with additional question sets.

3. Skill Enhancement

- Strengthened knowledge of Python concepts:
 - Functions
 - String Manipulation
 - Error Handling (basic level)
 - Applied structured programming approach for better code organization.
-

III. Challenges

1. USC_TIA Advanced Usage

- Faced difficulty in understanding advanced USC_TIA features and configurations.

Solution Approach:

Explored additional documentation and discussed issues with peers to improve understanding.

2. Error Handling in Python

- Encountered issues while handling unexpected user inputs and file errors.

Solution Approach:

Implemented basic validation techniques and practiced exception handling concepts.

IV. Learning Resources

1. USC_TIA Resources

- Continued referring to official documentation.
- Watched tutorials to understand advanced functionalities.

2. Python Learning

- Practiced Python problems related to functions and error handling.
 - Referred to online tutorials and coding platforms for hands-on experience.
-

V. Next Week's Goals

1. USC_TIA Development

- Gain proficiency in advanced USC_TIA features.
- Participate in discussions and contribute ideas for improvement.

2. Python Project Enhancement

- Implement random question selection feature.
 - Begin development of GUI-based quiz application using Tkinter.
 - Improve overall user experience and interface design.
-

VI. Additional Comments

Week 2 marked significant improvement in both technical skills and project development. The transition from basic implementation to enhanced functionality helped in gaining confidence in Python programming. Continuous learning and practical exposure contributed to better problem-solving abilities.
