

Weekly Progress Report

Name: Shrutika Bhimashankar Patane

Domain: Python Intern

Date of submission: 05/04/2026

Week Ending: 04

I. Overview:

This week, the primary focus was on completing and improving the GUI-based Python Quiz Game application while continuing to enhance understanding of USC_TIA advanced functionalities. Efforts were directed toward improving user experience, implementing additional features, and refining the application through testing and debugging. Significant progress was also made in strengthening problem-solving and debugging skills through practical project implementation.

II. Achievements:

1. USC_TIA Progress

- Explored advanced USC_TIA functionalities and integration methods.
 - Gained practical exposure to system workflows and configuration handling.
 - Improved understanding of troubleshooting techniques within USC_TIA.
-

2. Python Project Contributions:

Name of the Project: Quiz Game

- Completed the GUI-based Quiz Game application using Tkinter.
 - Added timer functionality for quiz questions.
 - Implemented score storage and final result display.
 - Enhanced user interface design for better usability and interaction.
 - Performed debugging and optimized program execution.
 - Tested application functionality with multiple question sets.
-

3. Learning Python:

- Improved practical understanding of:
 - o Tkinter GUI Components
 - o Event Handling
 - o Timer Functions
 - o Debugging and Error Handling
 - Applied Python skills to improve application performance and interactivity.
-

III. Challenges:

1. GUI Event Handling

- Faced difficulty in managing button events and timer synchronization in the GUI application.
- Ensuring smooth interaction between different GUI components was challenging.

Approach to Solution:

Reviewed Tkinter event-handling concepts, practiced sample programs, and tested multiple approaches to improve synchronization.

2. Debugging Application Errors

- Encountered runtime errors and unexpected behavior during feature integration.

Approach To Solution:

Used debugging techniques, checked logical flow step-by-step, and tested modules individually to identify and resolve errors.

IV. Learning Resources:

1. USC_TIA Documentation

- Continued using official USC_TIA documentation for troubleshooting and advanced concepts.
 - Referred to online tutorials and practical examples for better understanding.
-

2. Python Learning Resources

- Studied advanced Tkinter concepts through tutorials and coding examples.
 - Practiced debugging exercises and timer-based programs.
 - Explored programming forums and coding platforms for additional guidance.
-

V. Next Week's Goals:

1. USC_TIA Enhancement

- Gain deeper understanding of USC_TIA advanced modules and practical applications.
 - Participate in collaborative discussions for improving integration processes.
-

2. Python Project Development

- Add database connectivity for storing quiz questions and scores.
 - Implement user login and performance tracking features.
 - Improve application efficiency and overall project documentation.
-

VI. Additional Comments:

This week was highly productive and focused on transforming the Quiz Game project into a more interactive and user-friendly application. The experience gained through GUI development, debugging, and feature enhancement significantly improved technical knowledge and practical programming skills. Continued learning and implementation efforts are contributing positively to overall internship growth.
